Chris Loftis

San Francisco Bay Area, California | chris@chriswantsajob.com

PROFESSIONAL SUMMARY

- Detail-oriented software engineer with 4 years of experience in backend and cloud engineering
- Skilled in designing scalable cloud systems, microservices architectures and operating on high-traffic high-availability production systems
- Seeking to contribute to a project that helps people. Prefer privacy-oriented or environmentally beneficial work

KEY SKILLS

- Evaluating designs for scale, fault-tolerance, observability and extensibility
- Remaining calm and focused under service interruptions and short timelines
- Presenting design proposals and changes, speaking in front of audiences (100+)

WORK EXPERIENCE

Rivian & Volkswagen Group Technologies *Palo Alto, CA*
Software Engineer II **May 2025 – Present**

- Architected and built high-volume systems using message brokers and Kubernetes with Kotlin on the AWS platform
- Served as directly responsible individual (DRI) for integrations with eSIM component vendors
- Extended legacy serverless NodeJS codebase to support new business requirements
- Assisted with factory software integrations for new production lines for upcoming automobile models (e.g. the Rivian R2)
- Studied eSIM protocols to create one of the first connected cars to use SGP.32 eSIM technology

Swampfox Technologies, Inc. *Columbia, SC*
Software Developer II **Jan 2024 – May 2025**
Software Developer **May 2023 – Jan 2024**
Product Development Intern **May 2022 – May 2023**

- Developed telecom software that powers enterprise call centers with Java and SQL
- Designed and developed distributed reporting solutions using RabbitMQ and Postgres
- Served as technical lead/owner of mission critical software for high-availability systems
- Met with project managers, engineers and stakeholders from other companies to understand their needs and develop custom systems to integrate with their proprietary infrastructure
- Triaged and debugged live issues for production call centers handling 3,000+ simultaneous calls during critical service interruptions
- Wrote documentation and automated tests using JUnit5 and Mockito to ensure maintainability
- Served as a mentor and a technical resource for interns during their projects

EDUCATION

B.S. in Computer Science with Honors from University of South Carolina – Columbia, SC 2023
